### ***Response to Arguments***

Applicant's arguments, see page 7-11, filed 6/14/04, with respect to 1-24 have been fully considered and are persuasive. The non-final rejection of 3/9/2004 has been withdrawn.

### ***Allowable Subject Matter***

1. Claims 1-24 allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to show a ultrasound transducer having a substrate made of dielectric material that is not ultrasound transducing material; and a electrically conductive mesh disposed so that a portion intervenes between and is in contact with the electrical conductor on the substrate and the electrically conductive coating on the layer of ultrasound transducing material; and a adhesive material occupying interstices in the mesh and in contact with the electrically conductive coating and the electrical conductor. Prior art also fails to show, a pad of electrically conductive material formed on the surface of the substrate, the substrate being disposed so that the pad confronts the electrode; and electrically conductive mesh disposed so that a portion intervenes between an is in contact with the pad and the electrode; and adhesive material occupying spaces in the mesh and in contact with the pad and the electrode. Prior art also fails to show, a printed circuit bonded to a array transducer elements by adhesive material disposed between multiplicity of sections of an electrically conductive mesh embedded in the adhesive material, each one of the mesh sections being sandwich between a respective one the
